17. (Cancelled).

18. (Cancelled).

19. (Previously presented) A method performed by a computer system, comprising:
storing a version of a paper, the version being displayable on a display device as a likeness
of the paper;

at a first location within the version, detecting a reference to a second location, wherein the
second location is external to the paper, and wherein the detected reference is at least one of the
following, other than a computer network address: an alphanumeric character; a symbol; a term;
and a phrase;

in response to the detected reference, embedding a hyperlink within the detected reference
at the first location, wherein the second location is a file external to the paper, wherein the file
includes audio signal information, and wherein the hyperlink is selectable at the first location by a
user to cause an operation associated with the second location; and

while the first location is displayed on the display device, highlighting the first location to
indicate the hyperlink as being selectable at the first location by the user to cause the operation
associated with the second location, wherein the operation includes outputting audio signals in
response to the audio signal information and a selection of the first location by the user.

20. (Currently amended) A method performed by a computer system, comprising:
storing a version of a paper, the version being displayable on a display device as a likeness
of the paper;

at a first location within the version, detecting a reference to a second location, wherein the
second location is external to the paper, and wherein the detected reference is at least one of the
following, other than a computer network address: an alphanumeric character; a symbol; a term;
and a phrase;

in response to the detected reference, embedding a hyperlink within the detected reference
at the first location, wherein the second location is a file external to the paper-script, wherein the
file includes video image information, and wherein the hyperlink is selectable at the first location
by a user to cause an operation associated with the second location; and

while the first location is displayed on the display device, highlighting the first location to
indicate the hyperlink as being selectable at the first location by the user to cause the operation
associated with the second location, wherein the operation includes displaying video images on
the display device ~~executing the script in response to the video image information and~~ a selection
of the first location by the user.

Customer No. 53953

24. (Previously presented) A system, comprising:

a computing device for:

storing a version of a paper, the version being displayable on a display device as a likeness of the paper;

at a first location within the version, detecting a reference to a second location, wherein the second location is external to the paper, and wherein the detected reference is at least one of the following, other than a computer network address: an alphanumeric character; a symbol; a term; and a phrase;

in response to the detected reference, embedding a hyperlink within the detected reference at the first location, wherein the second location is a file external to the paper, wherein the file includes audio signal information, and wherein the hyperlink is selectable at the first location by a user to cause an operation associated with the second location; and

while the first location is displayed on the display device, highlighting the first location to indicate the hyperlink as being selectable at the first location by the user to cause the operation associated with the second location, wherein the operation includes outputting audio signals in response to the audio signal information and a selection of the first location by the user.

Docket No. 1005.6
Customer No. 53953

29. (Previously presented) A computer program product, comprising:
a computer program processable by a computer system for causing the computer system to:
store a version of a paper, the version being displayable on a display device as a likeness of
the paper;
at a first location within the version, detect a reference to a second location, wherein the
second location is external to the paper, and wherein the detected reference is at
least one of the following, other than a computer network address: an
alphanumeric character; a symbol; a term; and a phrase;
in response to the detected reference, embed a hyperlink within the detected reference at
the first location, wherein the second location is a file external to the paper, wherein
the file includes audio signal information, and wherein the hyperlink is selectable at
the first location by a user to cause an operation associated with the second
location; and
while the first location is displayed on the display device, highlight the first location to
indicate the hyperlink as being selectable at the first location by the user to cause
the operation associated with the second location, wherein the operation includes
outputting audio signals in response to the audio signal information and a selection
of the first location by the user; and
apparatus from which the computer program is accessible by the computer system.

Customer No. 53953

30. (Currently amended) A computer program product, comprising:
a computer program processable by a computer system for causing the computer system to:
store a version of a paper, the version being displayable on a display device as a likeness of
the paper;
at a first location within the version, detect a reference to a second location, wherein the
second location is external to the paper, and wherein the detected reference is at
least one of the following, other than a computer network address: an
alphanumeric character; a symbol; a term; and a phrase;
in response to the detected reference, embed a hyperlink within the detected reference at
the first location, wherein the second location is a file external to the paper-script,
wherein the file includes video image information, and wherein the hyperlink is
selectable at the first location by a user to cause an operation associated with the
second location; and
while the first location is displayed on the display device, highlight the first location to
indicate the hyperlink as being selectable at the first location by the user to cause
the operation associated with the second location, wherein the operation includes
displaying video images on the display device ~~executing the script~~ in response to
the video image information and a selection of the first location by the user; and
apparatus from which the computer program is accessible by the computer system.
